The Idea

■ The design criteria for this product was an intelligent and efficient mixture of packing, organising, presenting and transporting. The result was the **systainer®** system which we describe more fully in the following pages.

The company

TANOS GmbH was founded in Offenbach in 1993 as subsidiary company of TTS Tooltechnic Systems AG & Co. KG. The company objective is to market and further develop the **systainer®** product line.

Awards

The notable awards bestowed on the **systainer®** reflect the enormous interest which our product line has generated.

Patented linking technique

The patented linking technique of the **systainer®** guarantees a unique system.

100% ABS

The best raw materials, in combination with the most stable design structure, lead to a high degree of durability.

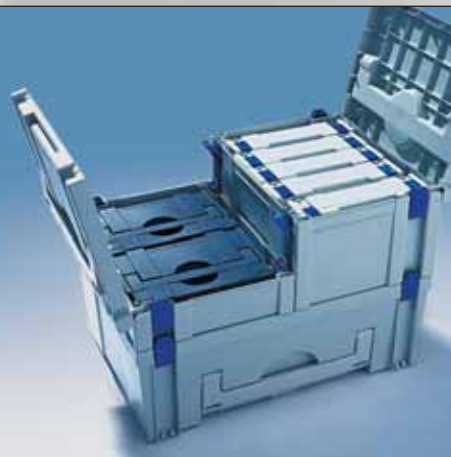

The linking technique of the systainer®

The form and functionality of the systainer® is ideal for a wide variety of uses. The original four systainer® sizes have been enriched with additional sizes. A patented linking of the individual systainer® units to form one unit, gives optimum handling.

Packing

systainer® sizes

Nine combinable sizes build up the centre of the product line.

Modular system

All systainer® units are quickly and individually linkable / combinable.

Comfortable transport

The systainer®-tower can be carried by a single handle and offers a high degree of mobility.

Exchangeability

Every component of the systainer®, such as lid, catch or handle, can be replaced easily.

Organising

The most important demand on an intelligent transport and packing system is a highly variable and diverse interior, which can be adapted to the customer's needs. The content has to be arranged clearly to guarantee fast and efficient access. It is also important for the content to be best protected.

Special compartment slot-in system

A special slot-in system offers adjustable compartmentalisation in no time at all.

Trays and boxes

Optimally-structured trays and combinable boxes offer efficient organisation of small parts and tools.

Fittings

Specially formed fittings for hand and electric tools extend the range of usability of the systainer® product line.

Foams

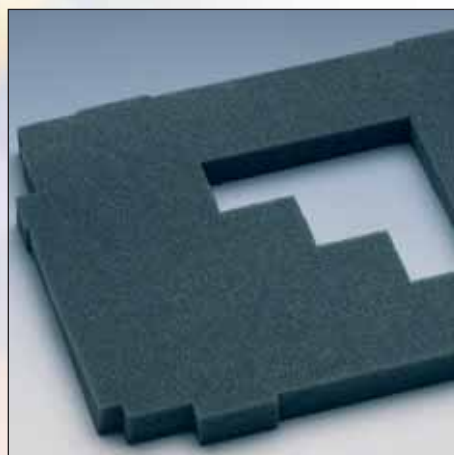

A carefully co-ordinated insert system ensures maximum inner cushioning. Special pick & plug foams offer many different ways of adaptation.

Lid inserts

Clearly structured lid inserts offer an optimal use of space.

systainer®-sets

Adapted to various demands, the systainer®-sets offer the possibility of a scalable, efficient storage system to use in office, hand-craft, medicine etc.

Presenting

■ It is the first view that counts. Optimal presentation is one of the most important tools in all companies. The systainer® product line offers fascinating exterior design combined with professional systematics. Adjusted to your corporate identity, the systainer® will be an important part in your marketing strategy.

Individualisation

An embossed company logo or a logo imprint offer the possibility of integrating the systainer® into your company concept.

Presentative organising

The presentation of contents can be optimally configured with the insert systems of the systainer®.

Safe handling

Easy loading and unloading, optimised with special inlays, will guarantee safe handling of the contents.

Transporting

■ The capacity to make a system mobile increases efficiency and economy. Only a product with easy handling can completely fulfill this task. Either in shipment with logistic groups or private transport, the systainer® product line meets all demands.

Patented linking

The innovative linking technique of several systainer® units into one offers simplified transport with one handle.

Transport without risk

With its recessed catches and handles, the exterior form is reduced to a pliable block.

Transport utensils

Intelligent transport utensils such as the caster, the folding trolley "TRAPO vario" or the carrying strap, will support you ergonomically and will adapt to different demands.

The idea of a system

The design of the systainer® system will guarantee flexibility to meet a multitude of demands. The ability to link all systainer®-sizes in an uncountable number of possibilities makes a wide variety of uses possible. Thus, your systainer® tower will make a brilliant impression whatever your demands.

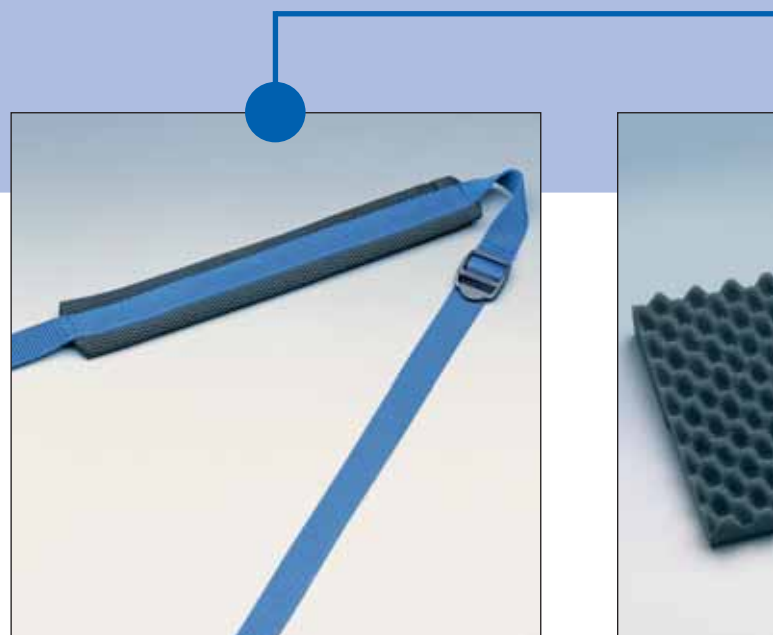

size	height	weight	outside dimensions in mm	inside dimensions in mm
systainer® I	105 mm	1,3 kg	H 105 x W 400 x D 300	H 72 x W 377 x D 277
systainer® II	157,5 mm	1,5 kg	H 157,5 x W 400 x D 300	H 124 x W 377 x D 277

Rack-systainer® IV	315 mm	6,8 kg	H 315 x W 400 x D 300	–

systainer® sizes

All sizes are based on and linkable with each other.

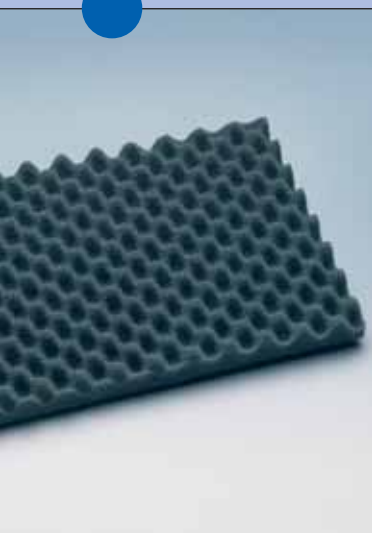

Interior

Trays, compartment dividers and cushions are always flexible and exchangeable or usable in many combinations.

systematic combination of different accessories within the systainer® product line

integral ability to link the systainer® unit together

Service

■ We do not limit our field of work to the production and sale of our products but we offer a complete service around the systainer® product line.

Consultation

For your individual needs we will work in co-operation with you to find a suitable solution for your demands, and make you a competitive offer.

We will support you in your marketing strategy as well as in the creation of the specification sheet.

Planning and making of samples

According to your needs, we will plan and construct the product and will create a sample in our workshop.

Colours

Apart from our two basic colours you have the choice from several other colour variants.

Print

Your company logo or a publicity slogan can be printed on the handle, the lid, on all four catches and on all four sides of the systainer®, even in colour print. You have also the possibility to add a sticker.

Design

With an individual choice of colours for handle, catches and body, you can adapt the image of your systainer® to your corporate design.

basic colours

 RAL 7035 *light grey*

 RAL 7016 *anthracite*

standard colours

 RAL 1007 *daffodil yellow*

 RAL 3002 *carmine red*

 RAL 5015 *sky blue*

 RAL 5003 *sapphire blue*

 RAL 6001 *emerald green*

 HKS 54 K *signal green*

 RAL 9016 *white*

 RAL 9004 *black*

Euro-standardised

The size of the systainer® units are standardised which allow flat stacking, save on volume and money in the transportation on pallets – whether in lorries, warehouse or in retail outlets.

Distribution

All systainer®-products are stocked in our modern warehouse until the production is complete. Afterwards, we will arrange the delivery. We will also arrange direct delivery to your client for you.

Possibilities of use

The possibilities for a use of our systainer® product line are extremely varied and not limited to one field. Thus, you can adapt systainer® and interior fittings to your needs, use readymade systainer®-sets or create your individual inserts.

A small choice of different possibilities of use

On the following pages, we will present all members of the **systainer®** product line. Clearly structured, you will find the products divided in five categories.

- empty-systainer®
- systainer®-sets
- systainer®-foams
- systainer®-inserts
- complementary products
- systainer® strongboxes
